

CAREER DEVELOPMENT

introduction

Career development programs were held to give exposure among the first year students so that we will be more aware on what will happen in few more years and what steps, do's and don'ts that we should be sensible of. We have had two programs which were the talk from **GetMe Hired** and also from the amazing huge company which is **Pittsburgh Plate Glass (PPG) Company**.

GETME HIRED

3 BIG DECISIONS IN LIFE !!!

1. what are we made for?
(job speculation)
2. where are we staying?
3. who are our life partner and best friends?

PPG

ADDITIONAL SKILLS

- Object-Oriented programming
- Java skills
- BI Knowledge
- Relational Database Management
- Understanding of Big Data Eco Systems

Re-evaluate job hunting strategy

- Plan** → identity and research
- Do** → prepare and apply
- Act** → do something, improve and upskill
- Check** → not be shortlisted for interview
→ not receiving any job offer after interview

OPPORTUNITIES IN JOINING PPG COMPANY

- Exposures beyond local parameters
- platform to share ideas
- Partners to mentor and advice
- Interaction in process, systems, tools, and people

What i should not do and how to prevent

1. Constraining ourselves from exploring (pursue opportunities!)
2. Not joining a lot of activities (participate in activities!)
3. Not improvising communication skills (improve your soft skills!)
4. Applying jobs after studies (start early!)

WHY PPG?

Opportunity to assume real responsibilities and gain work experience crucial to obtain a great start to the career chosen.

exclusive summary

The talks held by GetMe Hired and PPG had helped me in looking at my future in a more realistic way. I gained so many new knowledge that I did not even know before and that helps me a lot in entering the adult phase where I have to face lots of achievements and failures. By joining those sessions I got to know more about things that i Shoud have known earlier in industry field especially Data Engineering as I am studying **Data Engineering** now.
